

"The Safe and Secure
Online Meeting Forum
for Family, Friends, and Business."

ABOUT myforum2

COMPANY HISTORY

myforum2 was created after 4 long years of research and development. In 2002 Macromedia (now Adobe) started Beta testing the development of "a rich media socket server". Ayo Binitie the developer of **myforum2** was there. The result of this was the development of a variety of online real-time communication prototypes.

At first glance the early prototypes became the developer's personal communication module. It was new, it was fun and everybody was fascinated. Ayo expanded his horizons to the future potential for this Macromedia technology.

Ayo Binitie:

Publications/Editorial

1. Co Author: *Macromedia Flash MX 2004 Actionscript 2.0 Dictionary* – (Berkeley: Macromedia Press, 2004-Currently in Press)
2. Co Author: *Flash Communication Server MX: Strategic Solutions for Online Interaction* – (Berkeley: Macromedia Press, 2003)
3. Co Author/ Contributor: *Flash MX: Upgrade essentials* – (London: Friends of ED: 2002)
4. Book reviewer: *Zero to Hero, Fireworks* - (London: Friends of ED, 2002)

Adobe Image Ready	7 yrs
Macromedia Homesite	7 yrs
Macromedia Dreamweaver	7 yrs
Macromedia Fireworks 8	7 yrs
Macromedia Freehand	6 yrs
Corel Painter	10 yrs

Scripting Languages

Flash ActionScript 2.0 / 3.0
 Flash Communications Server Action Script
 Flash Remoting ActionScript
 JavaScript
 Cold Fusion
 PHP
 HTML, DHTML, XHTML
 CSS, XML, XSL, XSLT.

In 2003, Mr. Binitie was encouraged to create a commercial product using the prototype he had developed. He joined forces with two prominent business men from London. Gary Italiaander and Harry Simmonds. These gentlemen both successful in their own fields along with Ayo Binitie formed the company AGH Technology UK Ltd.

Several versions of the original prototype were developed. **Forum** was the first. Then came an undated version called **Forum II**. The product seemed ready and in the summer of 2005, AGH Technology began developing a marketing strategy.

The idea of Internet communication was not new but it was the platform of Macromedia and the unique aspect of NO SOFTWARE for the consumer that was so appealing to everyone involved in the project and anyone who saw it.

It was determined that the best market place to start would be the United States due to the U.S. having the greatest percentage of Broadband use in the world and is recognized as the technical proving ground for any new technology. Dave Rolfe, a successful business man from Boston, was contacted and approached to set up and establish the marketing for the company.

Myforum2 Inc was created and the project began. Dave Rolfe, now the CEO, along with Ayo Binitie, the developer, and Gary Italiaander and Harry Simmonds, the directors, welcome you to a brand new world of live interactive Internet video and voice communication.

OUR MISSION STATEMENT

To provide the simplest and safest individually operated Internet communication service in the world. Nothing beats face to face interaction and there is nothing like **myforum2 – the safe and secure online meeting forum for family, friends, and business.**

THE FUTURE

The development of version 2 of **myforum2** is all ready well under way. As new versions of Macromedia get developed and Broadband expands, new possibilities and added features and functionality keep emerging. The next version to be introduced and every new version after that will continue to make your **myforum2 online meeting forum** an incredible and fulfilling experience.

Today, **myforum2** is already ahead of the rest. When it comes to online live and interactive communication, **myforum2 has it all.** Video Conferencing has been limited to individuals and companies with big budgets and deep pockets. Communicating with others has been complicated by the requirement of software to participate. Collaborative efforts needed multiple programs and applications to be successful. Advertising and unwanted popups also ruin the experience. This is not the case with **myforum2.**

Explore, compare, and discover the difference. . . *and then experience the most powerful, complete, and private business and personal communication forum available in the world today with myforum2.*
